Downtown Nashville was bombed on Christmas, and now we know who did it.

On Sunday, officials identified Anthony Quinn Warner as the man who bombed downtown Nashville on Christmas Day. They said that Warner died in the explosion. The authorities determined that Anthony Warner, at the age of 63, was the bomber after analyzing DNA evidence at the scene of the bombing. The Tennessee Highway Patrol also confirmed that the RV's VIN was registered to him.

Douglas Korneski, the agent in charge of the Federal Bureau of Investigation Memphis Field Office said that they spent hours reviewing the surveillance footage of the area around the vehicle that held the explosive before it exploded. "We saw no other people who were near that RV. We are still following leads, but right now there isn't any indication that other people were involved with the explosion," Korneski stated.

According to the authorities, the RV arrived at an AT&T transmission building at 1:22 A.M. on Friday but it is still unclear if that building was targeted or not. Investigators of this case are working on finding the motive for Warner to set off the explosive as well as if the AT&T building was targeted.

New COVID Variant in UK

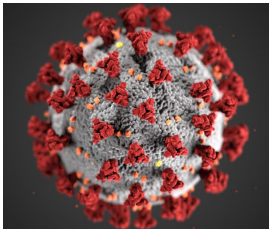

Diya V, 12/21/2020

The United Kingdom has found a new variant of the COVID-19 virus that's already starting to cause problems. This variant has been named VUI-202012/01 (Virus Under Investigation). A variant of a virus is a mutated version of the virus that has slight differences from the original virus. VUI-202012/01 is responsible for most of the recent increase in cases in England.

This variant is causing so much trouble for it spreads through the air faster, or transmits quicker person to person than COVID. It also is replacing other versions of the virus, and has a genetic fingerprint that is easier to track than other mutations. The last, and probably worst reason that this variant is causing trouble is because it's been shown to infect cells faster than other variants.

England's Chief medical officer, Chris Whitty, said that this new variant has 23 differences to the original, and has caused 60% of the new cases in London, which have doubled since last week alone.

This new variant of COVID-19 has been traced back to its origin, Southeast England, and the World Health Organization said it started in September. This variant has caused emergency meetings, increased cases, and traveler restrictions. We all hope it goes away soon.

Humble Holda (Hansel and Gretel from MY perspective)

Part 1 By: Lina K.

I'm sure many of you kids have heard of the story, Hansel and Gretel, yes? Well you probably heard it from those rotten two kids, where they described me as a horrible witch. But I'm not. My name is Holda the humble, or it used to be. Now everyone calls me Holda the Witch. Allow me to explain the **true** story.

I lived in the forest, and not many people saw me, but the ones that did never stayed for tea, and instead raced away. After 5 years of living like this, I decided to re-decorate my house. I put candy everywhere, and replaced the walls with gingerbread, hoping to attract people. But all that it attracted were ants and more ants. Until those sweet (or I thought they were) kids came along.

It was a nice evening, and I was inside cooking some sweets (my birds love them) when I heard a crunch. Now, normally I would let the ants eat away, but this sound was bigger. I grabbed the cake out of the oven and let it cool. My old worn brain thought, 'People! Visitors!'. I opened the door (or rather cookie door) and found two kids eating my house. I worried, for there were ants that could bite them, so I rushed them inside. They looked at me suspiciously and then finally came in.

I treated them to everything I made. My birds seemed jealous, but the kids had already eaten everything I gave them, so I gave my birds a few crumbs. My fellow pets were **not** satisfied with what I had given them. I guess that's why after I asked the boy to put some water in their cage, the birds shut the cage door. Now the girl wasn't looking, and so later she must have assumed I shut the door, which isn't fair if you ask me.
